

Use Komposer to create a homepage for you and your partner. Save this page as `myhomepage.htm`. Include images and make it fun. Also, include a hyperlink on your homepage that links to the Webpage shown below in Figure 1, called `classexercise.htm` (WHICH YOU ALSO NEED TO CREATE & SAVE). The page should start with the sentence *Please enter the dimensions of the desired table below* and then include a form containing a 4x2 table with cells containing text, textboxes and buttons as shown below.

Enter your name	<input type="text"/>
Enter number of rows	<input type="text" value="1"/>
Enter number of columns	<input type="text" value="1"/>
<input type="submit" value="Submit"/>	<input type="button" value="Reset"/>

Figure 1: Webpage `classexercise.htm`

The submit button of the form should submit to a 3rd page shown below in Figure 2, called `createtable.htm` (WHICH YOU ALSO NEED TO CREATE & SAVE). For now, the page will include `????` instead of the actual name input by the user and the table create is a 1x1.

Hello ????. Here is your table
